**Questions:**

When is the Christopher Brook / N Main Street work scheduled to be complete? When will it actually be completed? Will police help traffic flow better once the school buses start running? I hear it has been horrible in the mornings as it is.

**Answer:**

The Christopher Brook Culvert replacement project is supposed to be completed in the Spring of 2017. Prior to the end of construction this winter, a binder coat should be in place and traffic should be open in both directions.
