Wayne Rand was present at the meeting to answer questions and present any aspect of the project the members need clarifying and understanding. The main employees from other sites will be brought over initially while the hiring process is happening. There will be 3-4 new part-time employees hired and one full-time employee from a closed location brought to work at the new location. There will be \$1.5 million put into the building for renovations and remodeling into the storage units. The renovations should be finished in 2 months. The building needs to be unoccupied for 12 months or more to be considered blighted building. It was officially unoccupied for almost 6 months. The time stopped when Mr. Wayne bought the building. One floor was lowered and added reinforcements to make a second floor. There was concrete added to the second floor so cars and other heavy items can be stored on second floor. There were two assessments made by town, one with the second floor listed and one with no second floor listed. The plan is to leave the second floor empty for now and wait for the first floor to fill up. Once all units on the first floor are taken, then the units will be built on the second

floor. Or the second floor could only be used for car, boat, and other large item storage. In the lease for the units, there is a clause stating there will be no hazardous materials stored. During the discussion the members scored each section of the application. The score the members decided on counted up to 47 points. The report will be submitted to the Town Council within 30 days for their approval or rejection. *A motion was made by Mr. Turner, seconded by Mr. Higgins, to close the open meeting for the application for Global 66. Voted 6-0 in favor.*
