I confirmed the following with your staff technician, Cheryl.

There are six poles as identified in a full exhibit already. The fixtures are at 17 feet with a full cover as depicted in the submitted material. The bulbs are each the equivalent of 200 watts. Each pole will have 2 bulbs.

The photometrics drawings already submitted and as depicted in the material reflect the above specifications.

If anything remains open, please do not hesitate to contact me or will come to East Hampton tomorrow, Wednesday.

Thank you.
