Good evening,

We will send a check in for the amount of \$135.

-Yes I am going to be the control agent. Property owner John & Kaitlyn Brown.

- Project narrative description . Position the house 40 back from the current position on the plot plan to allow more driveway space/ turn around in front of the house. This will also allow more privacy between neighboring homes.

- As of now I do not have an updated plot plan.

Thanks

1. The Erosion Control Agent is, Contractor?, property owner?
2. Project Narrative/Description
3. Do you have an updated site plan for updated location closer to wetland? For now I have attached survey provided.

Hi John,

I have reviewed the plans as shown, and my opinion is that the house is currently located in a good location. I would not recommend moving it back further on the property. Currently, the vast majority of the work is out of the wetland upland review area, which is preferred. Homeowners have a tendency to want rear yards. Pushing the house closer to the wetland will minimize the amount of yard space homeowners will have, causing me to be concerned about yard creep in the future into the wetland area. Furthermore, moving the house back will also necessitate an alternative location for the well. The well has several protective radii around it which you may not be able to meet if the house is further north.

Thank you for your consideration.
