Application at Lot 10 Flanders Road East Hampton

5. Written Narrative

I, Kevin Kiely, own lots 10 and 10A as shown on the attached location map. Lot 10A is mostly consumed by a pond locally known as Cranberry Bog. Cranberry Bog discharges to the east through a baffled outlet structure and 24" corrugated plastic pipe. This discharge creates an intermittent watercourse which divides my adjacent parcel. Historically, access to the southern portion of Lot 10 has been through the old railroad bed owned by the State of Connecticut. In recent years I have been donating use this space to the East Hampton Parks and Recreation Department for use as crop share garden space. I am requesting this wetland permit to install a twenty foot section of 24" corrugated plastic pipe within the intermittent water course to provide access to the rear portion of Lot 10 without relying on access through state land. I intend to backfill the culvert with crushed gravel and use larger stones to stabilize the gravel on each end. This work will be performed with a small excavator and or backhoe. Little disturbance is expected outside of the proposed work area. Work is expected to be completed in one to two days and will be scheduled during dry weather to avoid any erosion issues. Care will be taken to provide adequate erosion control measures such as silt fence or hay bales as needed.
