## CHECKLIST FOR A COMPLETE APPLICATION

- completed application form including Department of Energy and Environmental Protection reporting form (green copy)
  - A narrative of the purpose and description and methodology of all proposed activities;
  - Alternatives considered by the applicant, reasons for leaving less than a 10' buffer between clearing and the wetlands. Such alternatives to be diagrammed on a site plan or drawing and submitted to the commission as part of the application;
  - Names and mailing addresses of abutting property owners;
  - Three copies of approximately 1"=40' scale plans
  - Locations of existing and proposed land uses
  - Locations of existing and proposed buildings
  - Locations of existing and proposed subsurface sewage disposal systems, and test hole descriptions
  - Existing and proposed topographical and man-made features including roads and driveways, on and adjacent to the site. Include a colored grading plan showing areas to be filled (green) and areas to be excavated (brown) that clearly shows existing and proposed contours and proposed limits of disturbance.
  - Location and diagrams of proposed erosion control structures
  - Pictures of existing conditions clearly showing all areas to be disturbed, and/or cleared of vegetation.
  - Assessor map, block and lot number
  - Key or inset map
  - North arrow
  - Flood zone classification and delineation
  - Use of wetland and watercourse markers where appropriate.
  - Soil types classification and boundary delineation (flagged and numbered boundary), Soil Scientist's original signature and certification on plans
  - Soil Scientist's (or other wetland scientist) report on the function of the wetlands
  - Watercourse channel location and flow direction, where appropriate
  - 100 ft. regulated area depicted on plans
  - Conservation easements where appropriate
  - A detailed erosion and sediment control plan which meets requirements set forth in the most recent revision of the *Connecticut Guidelines for Soil Erosion and Sediment Control*, published by the Connecticut Council on Soil and Water Conservation, including:
    - Location of areas to be stripped of vegetation and other unprotected areas
    - Schedule of operations including starting and completion dates for major development phases
    - Seeding, sodding, or re-vegetation plans for all unprotected or un-vegetated areas
    - Location and design of structural sediment control measures
    - Timing of planned sediment control measures
    - Use of wetland and watercourse markers
    - Proper certification on the application documents and plans
- In the case of filling in wetlands, watercourses, or regulated upland areas, the following items are necessary:
- Area to be filled
  - Volume of requested fill
  - Finished slopes of filled areas
  - Containment and stabilization measures
  - Proposed finished contours
  - Evaluation of the effect of filling the wetlands with respect to storage volume and its impact downstream showing before and after development flows, and the evaluation of storm water detention including the existing need for flood control downstream
- Other required items:
- Proof of adjoining Town notification, where required;
  - All application fees required by Section 19 of these regulations;
  - A written narrative detailing how the effects of the applicant's proposed activities upon wetlands and watercourses shall be mitigated.
  - A written description of any and all future plans which may be linked to the activities proposed in the current application.
  - Address the potential to enhance the current buffer area.
  - Review drainage information with Town Engineering
  - Mailing requirements for abutters (public hearing only)
