Jeremy,

To further answer a few outstanding questions.

Attached is a pdf site plan.

- The map shows the location of an anticipated trail that would connect to the airline trail.
- Also designated is the location of an Eagle scout project where the Scout would like to build three primitive camp sites for boy scout use.
- The only other project in the works is another eagle scout project where the scout will build screech owl nesting boxes. The exact location is yet to be determined but their location impact is negligible.

No other construction is planned, and the only other activity anticipated into the future is general landscaping.
