Re: Parking plan for Lot -2, 201 West High Street
Date: March 28, 2019

I have seen the parking plan for the aforementioned property and see no conflict with the septic plans on file for that address. My only comment is that the plan shows retail/personal services as uses in the forward portion of the building. While zoning may see these as interchangeable terms, health does not. For example; a beauty parlor is a personal service but the sewage wastes are not necessarily considered domestic sewage so in some case a septic system may not accommodate the use. Our acceptance of this plan is not to be construed as acceptance of specific future uses that may be "personal services".
