DATA SOURCES

BASE MAP DATA - All data is based on 2008 LIDAR ground elevation data. The University of Connecticut Center for Geographic Information Systems (CGIS) processed the data and added it to the data base with street and hydrography data from the 2008 LIDAR data. The map data is derived from the 2008 LIDAR data.

STREET DATA - Based on TeleAtlas copyrighted (©2008) data. Street names, symbols, and other information are derived from the TeleAtlas database.

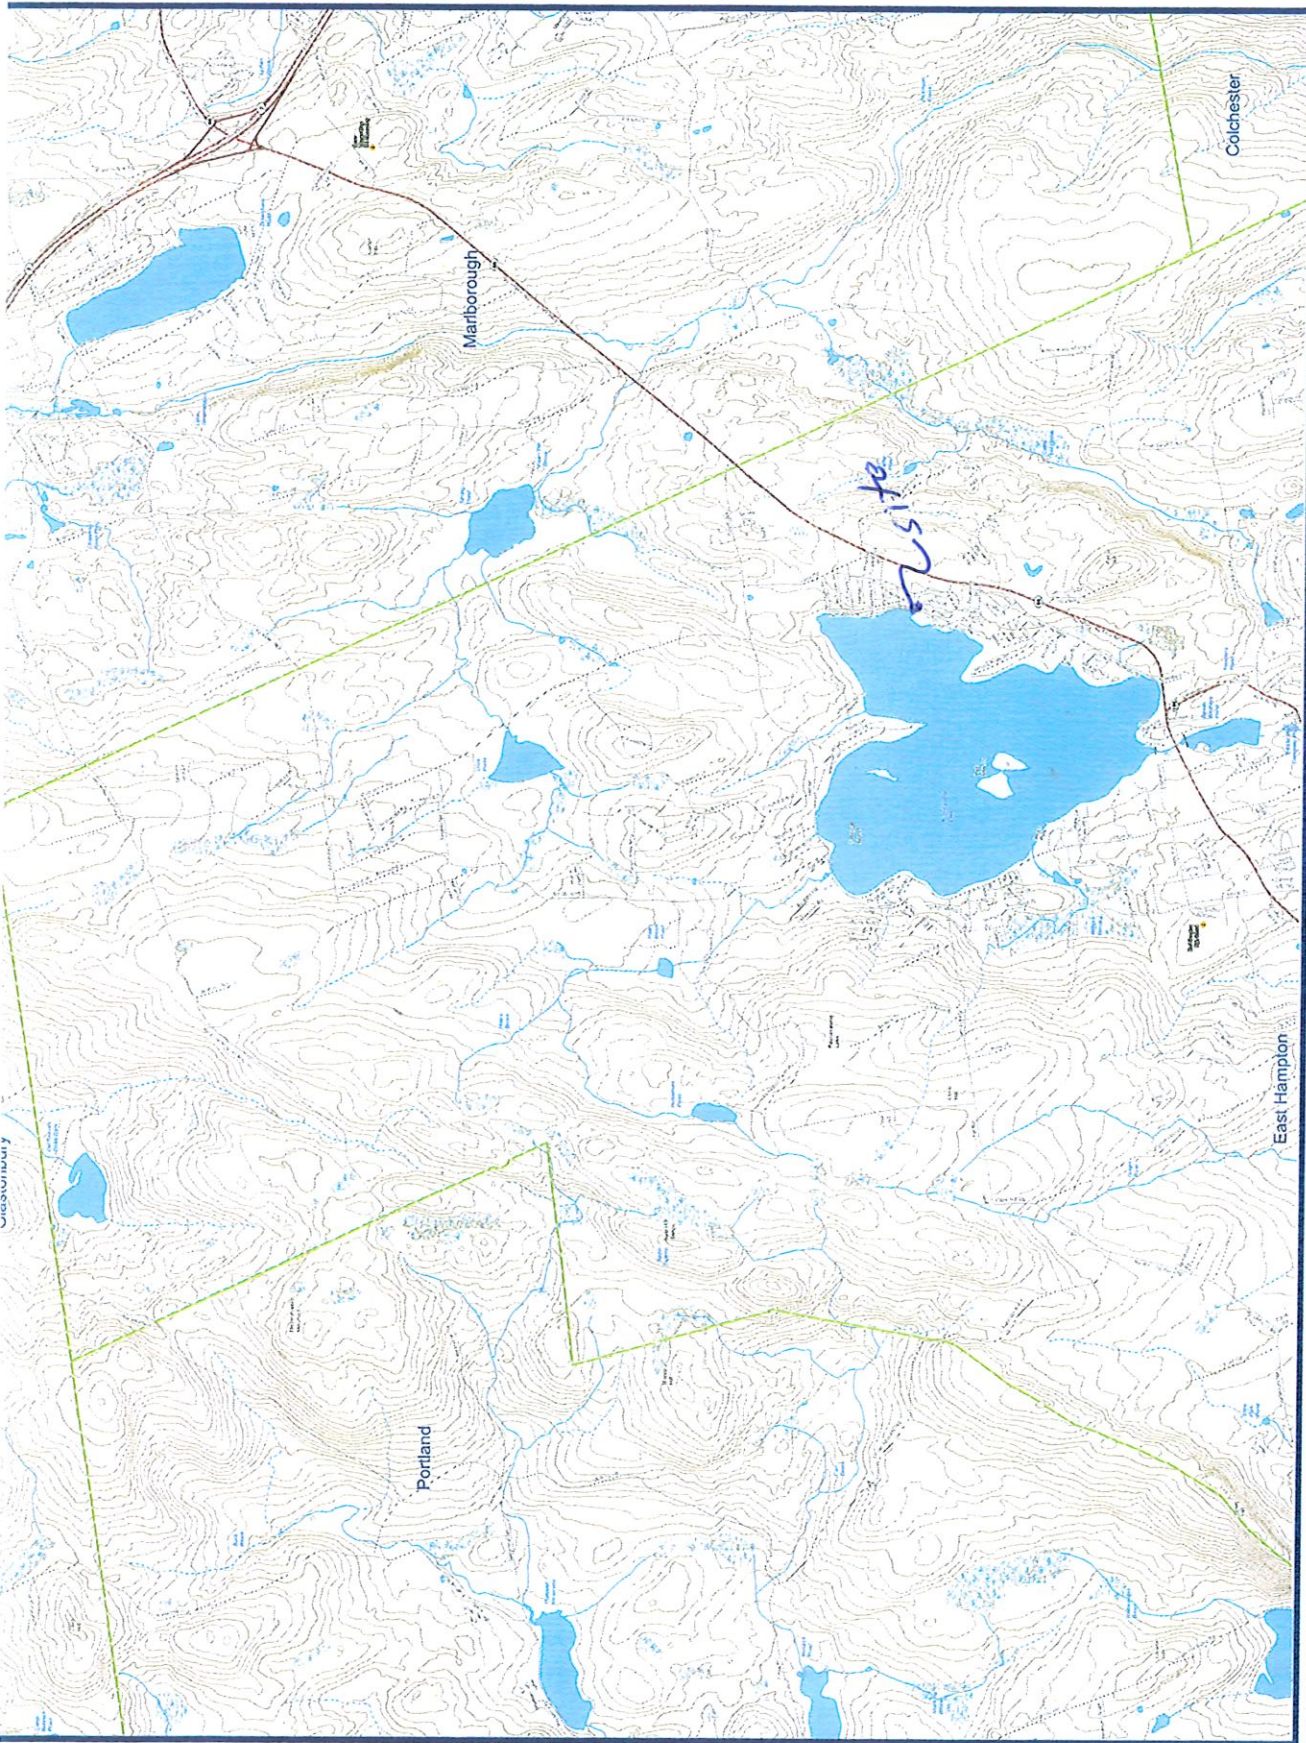

HYDROGRAPHIC DATA - Derived from the 2008 LIDAR data and the 2008 LIDAR data.

EXPLANATION

Contour lines are used to denote elevation above sea level. For unshaded areas, data was collected primarily in some areas. This shaded area indicates that the overall information from a complete collection of ground elevation data for the year 2008. This information is only available for the shaded area. The shaded area is not intended for use in any other way. It is not intended for use in any other way. It is not intended for use in any other way.

Contour lines that cross streams flowing through a valley are drawn with a V-shape pointing upstream. Contour lines that cross streams flowing through a valley are drawn with a V-shape pointing upstream.
