Hi Jeremy!

I just learned about a meeting next week to discuss the St Clements Castle Marina Development project.

As a business owner in East Hampton and a member of the East Hampton EDC, I would like to express my support of the project.

I actually attended an info session earlier in the year sponsored by the Middlesex Chamber. At the event, St Clements put on a great presentation and detailed the benefits to the town and the community.

I know the project will generate additional tax revenue as well as creating new jobs for the area. But, most importantly, I like the idea of the potential for up to 50,000 additional guests visiting the Marina and the East Hampton community. This gives more people the chance to see the town of East Hampton and experience the sites, restaurants, and shops that we have to offer. The EDC is always looking for way to generate more interest and visits to East Hampton, and I think this could be a great opportunity to do just that.

I request that the Planning and Zoning commission seriously consider granting the zoning change needed to make the Marina Development project succeed.

Thanks, Jeremy!
