IWWA

Town of East Hampton

The purpose and use of the proposed culvert:

- to be able to access both sides of the brook to maintain fields and have access to the donated area of the garden club
- the dam that exists is the actual property line of the pond (Cranberry Bog) and the hay field and you would not be able to pass over the dam
- the plan is to install a 2 foot PVC pipe into the brook to allow for a road to access both sides of the property
- we have access thru the right of way at present, but if that is ever taken away we would have no access to the other side of the property

Respectfully submitted,

Kevin Kiely
