

Narrative for scope of work for 59-61 Waterhole Road:

I would like to construct a 17.1' x 25' one car garage with a one room addition above it. I will be excavating 8' down to build the foundation for the garage so that it will be at a basement level and the addition above will be at the house level. I will also be extending the existing driveway another 100' to access the garage which will be paved in the future and will be replacing the existing walkway and replacing it with pavers. The work will be done within the Upland Review Area. Runoff from the new structure will go directly into a rain garden. Prior to and during construction, I will have silt fencing in place along with hay bales for Erosion and Sedimentation controls.
