Re: Wetlands Permit for 29 Pocotopaug Dr project narrative

Name: John Uliano

Install silt fence between property and wetland and continue to have fence in place during construction. Move dirt for pool (35'x15'), propane tank (5'x11'), and area near retaining wall (~20'x15') to level the property about ~2- 3 feet (see pictures and print). Install two retaining walls, one man made block (~30' long 4.5' high tapering down to 0'), one made of natural stones (~50', 2-3 feet high tapering down to 0') See pictures and print. Install pool (see pictures), pavers, and covered area (see pictures for open construction). Plant seed and landscape yard. This project has already been approved by the Zoning Board of Appeals.
