

I would like to add a 12 * 16 shed to the property. The shed will be 6 ½ feet from the property sideline. The abutting neighbor, Marian Scott and I discussed the location and she is ok with the placement. I have indicated the location on the enclosed survey. The location is to the North side of the driveway next to the existing paver section of the driveway. The closest point of the shed to the lake will be 98 feet. There will be a gravel base placed over landscape fabric for the shed to sit on. This was the suggested method Jeremy requested. There will be gravel that extends past the drip lines of the shed roof for the water that comes off of the roof.

The shed will store wood used for winter heating in my wood stove. I will also utilize the space inside to store personal lake front items in the off season, personal landscape tools and a John Deere x300 garden tractor and trailer.
