Description of Regulated Activities:

Clark Hill Road: Installation of Bioretention system, grass swale and overflow pipe on property owned by the Town of East Hampton. The closest point of the Bioretention system is approximately 180' from the edge of Lake pocotopaug. There is no direct wetland or watercourse impact.

Boulder Lane: Installation of Wet Swale in the Right of Way of Boulder Lane within 50' of a wetland area located to the east of Boulder Lane. The southern end of the Wet Swale will discharge into an existing drainage ditch. There is no direct wetland or watercourse impact.

Mott Hill Road: Installation of a short Wet Swale within the Right of Way of Mott Hill Road on the west side of Mott Hill Road. There is no direct wetland or watercourse impact.

Mohican Trail: Installation of an Open Cell Paver System within the Right of Way of Mohican Trail. This is no direct wetland or watercourse impact.
