We the undersigned, agree the building at 249 West High St, East Hampton, CT, has existed as a fueling station with an apartment on the second floor since 1951. Hilltop Motors occupied the business for about 6 years. In or sometime in 1950's Esso bought 249 West High St. The tanks and gas pumps were there until 1987 when I removed them. At the time, Jim Carey (building inspector), and I decided the tanks could be certified, but i wanted no liability and agreed to replace the tanks and install New tanks with sensors to detect leaks. (1987)
